#### **Method Used to Conduct Review:**

With Executive Order 2020-03 and subsequent guidance from the Governor, the Oklahoma State Department of Health (OSDH) immediately began efforts to reduce regulations. A thorough analysis of agency regulation was completed by the policy team to collect baseline data on the number of pages of regulation, active sections, and frequency of regulatory words as outlined in EO2020-03. This information was disseminated to program areas through an in-person meeting and the agency policy website. An initial review of chapters by specific program areas was conducted to begin identification of specific costly, ineffective, duplicative, and outdated/unnecessary regulation. The policy team provided a regulation reduction survey to all program areas through the Microsoft Forms application. Program areas were slated to complete these initial indications for reduction by the end of March. The information collected from the surveys is being used to inform decisions concerning regulation reduction for 2021 and 2022. Follow up with program areas by the policy team is ongoing.

Shortly after the policy team's initial, high level review, OSDH became heavily involved in response to Covid-19. A large majority of health department rules (72%) are housed within the Prevention, & Preparedness arm of the agency which was most profoundly impacted by Covid response efforts. This has resulted in a temporary suspension of regulation reduction efforts for many programs in this area. The agency plans to fully resume these reduction efforts when Covid response begins to taper off and are tentatively slated for session in 2022.

**TOTAL NUMBER OF UNECESSARY, COSTLY, INEFFECTIVE, DUPLICATIVE OR OUTDATED REGULATIONS:** 175 sections
